PROFESSIONAL SUMMARY

A seasoned and result-oriented software engineer bringing nearly 3 years of experience in the fintech industry, skilled in developing scalable and high-performance Flutter applications for mobile and web platforms. I am an inquisitive, driven, and self-motivated professional, with expertise in clean architecture, state management, and performance optimization. I am seeking a challenging role to enhance my skills while learning new technologies. My technical proficiency and passion for creating seamless user experiences position me to make a meaningful impact for your team.

WORK EXPERIENCE (2 years, 7 months)

FYERS Securities

Bengaluru, Karnataka

Software Engineer - 2

Apr 2025 – Present

- Developing and maintaining cross-platform Fyers trading platform using Flutter for both web and mobile.
- Focusing on **Order Window** and **Option Chain** modules, enabling real-time market data visualization and seamless trading execution using **Flutter Bloc** for state management.
- Collaborating with backend and QA teams to deliver high-performance, responsive, and secure user interfaces.
- Implementing efficient state management, WebSocket integration, and API handling for live trading data.

Open Financial Technologies

Software Engineer

Aug 2023 – Mar 2025

- Launched the **Open Business Payments App** for Android and iOS, processing 300+ daily transactions.
- Adopted **MVVM with Clean Architecture** to improve maintainability, and scalability of the codebase.
- Enhanced app reliability using **Firebase Crashlytics**, reducing crash occurrences by 25%.
- Migrated state management from Provider to **Riverpod**, improving performance and code clarity.
- Created custom plugins using Flutter's platform channels to integrate native Android and iOS functionality.
- Developed **NEO for Business (Axis Bank)** — a hybrid fintech app achieving over 50K+ downloads.
- Implemented **SSL Pinning** and **SIM Binding** to strengthen app-level security.
- Automated Flutter build generation using Jenkins CI/CD, reducing deployment time and human errors.

Engineering Intern

May 2023 – Aug 2023

- Contributed to the development and bug fixing of fintech Flutter applications, improving overall app stability.
- Gained hands-on experience in REST API integration, state management, and UI optimization for mobile apps.

PROJECTS & HACKATHONS

DataTalk (OpenGenAI Hackathon) | LLM, Python, AWS, LangChain

Mar. 2024

- Developed DataTalk, an AI-powered analytics assistant using AWS Bedrock to answer natural language queries.
- Integrated LLMs with dynamic SQL generation and similarity search to automate data-driven insights.
- Optimized model execution with LangChain, reducing API cost and latency by 50%.
- Won 3rd prize in the OpenGenAI Hackathon; reduced analytics time for business teams by up to 80%.

SKILLS

Languages: Dart, Java, C

Technologies: Flutter, Firebase, Riverpod, Provider, BLoC, Retrofit, Dio, Android, iOS, SQLite, Hive, JSON, REST API, MVVM, MVC, AI Agents, MCP Server

Architectures: Clean Architecture, State Management, OOPs, Responsive UI Design, Modular Code Structure

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Postman, Visual Studio Code, Android Studio, Xcode, Jira, Sourcetree, Apidog, Slack, Cursor

Platforms: macOS, Windows

Soft Skills: Leadership, Collaboration, Problem Solving, Creativity, Time Management

EDUCATION

Odisha University of Technology and Research

Bhubaneswar, Odisha

Bachelor of Technology, Information Technology, CGPA: 9.46

Aug 2019 – Apr 2023
