PROFESSIONAL SUMMARY

Dynamic and results-driven Software Engineer with 1.1 years of experience in developing scalable and innovative software solutions. Proficient in Flutter for cross-platform mobile app development and Spring Boot for backend development. Proven track record of delivering high-quality software products that meet requirements and exceed expectations.

WORK EXPERIENCE

Overall Experience: 1.1 years

Open Financial Technologies

Aug 2023 – Present

Software Engineer (Mobile Application Developer - Flutter)

- Implemented MVVM and clean architecture to enhance code organisation, scalability, and maintainability of Flutter application.
- Utilised Flutter Riverpod providers to manage UI and business logic, simplifying state management and enhancing project efficiency.
- Leveraged shared preferences in Flutter to optimise user preferences and app performance.
- Implemented app localization for multiple languages using Flutter and the l10n package, enhancing user experience by supporting diverse linguistic needs.
- Experience using plugins and packages.
- Contributed to the development of Open Business Payments, a widely-used app with over 1000+ downloads on Google Play Store.
- Successfully deployed Flutter applications to both the Google Play Store and Apple App Store.
- Successfully integrated Flutter application with backend systems, collaborating closely with backend and cross-functional teams.

Open Financial Technologies (Internship)

May 2023 – July 2023

Software Engineer (Intern)

- Developed multiple Flutter projects utilising the Flutter framework, focusing on UI/UX design and functionality.
- Acquired proficiency in utilising Flutter packages such as HTTP and Dio for API calls, Provider for state management, Flutter Hooks for streamlined development, and JSON annotation for data handling.
- Implemented advanced Flutter concepts like app initialization best practices to ensure smooth user experiences.
- Used advanced Flutter techniques including using Freezed for immutable data structures and efficient memory management.
- Acquired hands-on experience in developing scalable mobile applications using Flutter.
- Collaborated effectively with cross-functional teams to integrate backend services with Flutter applications.
- Acquired knowledge in version control systems like Git for collaborative development.

PERSONAL PROJECTS AND CERTIFICATIONS

Reusable Component Library in Flutter (Melos Mono Repo)

- Developed a versatile UI component library in Flutter, neatly organised within a Melos-managed mono repository.
- Integrated these components seamlessly across various projects, promoting code reusability and scalability.

Demo Bus Routes Tracking App

- Designed and implemented a user-friendly bus routes tracking application using Flutter.
- Implemented notification features to alert users prior to bus departure times, enhancing user experience.
- Managed data retrieval and manipulation using JSON parsing techniques.

E-commerce app (Full Stack)

- Currently developing an ecommerce web application using Spring Boot and MySQL and Thymeleaf.
- Utilised Spring's Dependency Injection: Leveraged Spring's powerful dependency injection capabilities to manage application dependencies effectively, promoting modularity and testability.
- Annotated Configuration: Utilised annotations such as `@Component`, `@Service`, and `@Repository` for declarative configuration of application components, promoting clarity and reducing configuration overhead.
- Entity Management with JPA: Leveraged Spring Data JPA for seamless interaction with databases, utilising entity classes to map database tables and perform CRUD operations efficiently.
- Implemented Data Access Layer: Designed and implemented data access layer using Spring Data JPA repositories, abstracting away database interactions and promoting code reuse.
- Security Implementation: Integrated Spring Security for robust authentication and authorization mechanisms, ensuring secure access to application resources.

OpenGenAI Hackathon

Engaged in AI exploration during the OpenGenAI hackathon

AWS Academy Cloud Foundations Certification

SKILLS

- Programming Languages: Dart, Java
- Mobile Development: Flutter
- Web Development: HTML, CSS, JavaScript
- Backend Development: Spring Boot, Java Spring
- Database Management: MySQL
- Version Control: Git
- RESTful APIs
- Data Structures and Algorithms
- Problem-solving and Debugging
- Strong Communication and Collaboration Skills

EDUCATION

Odisha University of Technology and Research

Aug 2019 - Apr 2023

Bachelor of Technology, Information Technology

CGPA: 9.46

Pursued a Bachelor's degree in Information Technology from a reputable university where I gained a comprehensive understanding of computer systems, programming languages, network security, and database management. Coursework included classes in data structures, algorithms, software development, and cyber ethics.
