PROFESSIONAL SUMMARY

A seasoned and result-oriented software engineer with over 1.5 years of experience in the fintech industry, skilled in designing scalable backend systems and developing RESTful APIs. I am an inquisitive, driven, and self-motivated professional, with expertise in microservices, database management, and system architecture. I am seeking a challenging role to enhance my skills while learning new technologies. My technical proficiency and passion for continuous improvement position me to make a meaningful impact for your team.

WORK EXPERIENCE

Software Engineer

Aug 2023 – Present

Open Financial Technologies

Bengaluru, Karnataka

- Built secure RESTful APIs for Open Money's backend services, with a focus on keeping response times low.
- **KYC Service Migration:** Led the migration of the Know Your Customer module from a monolithic structure to a standalone microservice, improving scalability and maintainability.
- Designed a common API gateway to route fund transfer requests to different partner banks' APIs based on bank ID and transaction details, centralizing and simplifying API integration.
- **Automated build generation** for all mobile applications using Jenkins CI/CD, saving development time.
- Implemented data caching using Redis to reduce database load and improve response times by 40%.
- Designed and optimized database schemas, improved query performance, and managed data integrity across DBs.
- **Scheduled Tasks:** Automated data cleanups and payment processing with Spring Boot cron jobs.

Engineering Intern

May. 2023 – Aug 2023

Open Financial Technologies

Bengaluru, Karnataka

- Performed code refactoring and bug fixes on the existing codebase, improving maintainability and efficiency.
- Gained hands-on experience in Spring Boot, REST APIs, and backend architecture, working with backend systems
- Contributed to real-time data sync and transaction management by building and optimizing backend APIs.

PROJECTS & HACKATHONS

DataTalk (OpenGenAI Hackathon) | LLM, Python, AWS, LangChain

Mar. 2024

- Developed DataTalk, an AI model to answer user queries on Open Money's invoicing module using AWS Bedrock
- Used similarity search to generate dynamic SQL queries and presented the data as Natural language using LLMs.
- Optimized the LLM using LangChain framework to reduce API cost and response times by 50%.
- The project won 3rd prize in the OpenGenAI Hackathon and reduced data analytics effort at Open by upto 80%.

Football Merch | Spring Boot, Java, Maven, Spring Data JPA, Git

- Developed an e-commerce application for football merchandise using Spring Boot and thymeleaf.
- Utilised Spring Data JPA and Spring Boot to create APIs for products, orders and other e-commerce components.
- Implemented thymeleaf templating engine for server side rendering of web pages following MVC approach.

SKILLS

Languages: Java, Python, Dart

Technologies: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, AWS, Kafka

Architectures: System Design, Data Structures & Algorithms, OOPs, REST API, Microservices, MVC, ORM

Databases: RDBMS – MySQL, PostgreSQL

Tools: Git, GitHub, Postman, Slack, Grafana, Prometheus, Visual Studio Code, IntelliJ, Jira, Sourcetree, Redis, Docker

Platforms: macOS, Windows

Soft Skills: Leadership, Communication and Collaboration, Time Management, Creative thinking, Problem solving

EDUCATION

Odisha University of Technology and Research

Aug. 2019 – Apr 2023

Bachelor of Technology, Information Technology, CGPA: 9.46

Bhubaneswar, Odisha

DAV Public School

May. 2018 – Apr 2019

Higher Secondary, Science, Result: 93.8%

Bhubaneswar, Odisha
