PROFESSIONAL SUMMARY

A seasoned and result-oriented Software Engineer with over a year of experience in the fintech industry, skilled in building scalable, user-focused flutter applications. I am an inquisitive, driven, and self-motivated professional, adept at problem-solving, debugging and unit testing. I am seeking a challenging role that will allow me to further enhance my skills and learn new tech stacks. My technical proficiency and passion for continuous learning position me to make a significant impact within your team.

EXPERIENCE

Open Financial Technologies

May 2023 – Present

Software Engineer

Bengaluru, Karnataka

- **Open Business Payments app:**

- Launched Open Business Payments app on PlayStore and App Store processing 300+ transactions daily.
- Improved code maintenance and organization by implementing **MVVM** with clean architecture.
- Enhanced app stability by implementing **Firebase Crashlytics**, reducing unresolved crashes by 25%.
- Migrated state management from Providers to **Flutter Riverpod**, optimizing state handling and performance.
- Created custom packages and plugins using method channels to reduce third-party dependencies.

- **NEO for Business - Axis Bank:**

- Developed a large-scale webview focused app in conjunction with Axis Bank achieveing **50K+** downloads.
- Implemented SSL pinning and SIM Binding to enhance security and ensure robust user authentication.

- **Automated build generation** for all mobile applications using Jenkins CI/CD, saving development time.

- Built multiple POC projects, including a bus routes app with real-time notifications and a Flutter UI components library, contributing to rapid prototyping and efficient implementation of new features.

PROJECTS & HACKATHONS

DataTalk (OpenGenAI Hackathon) | LLM, Python, AWS, LangChain

Mar. 2024

- Developed DataTalk, an AI model to answer user queries on Open Money's invoicing module using AWS Bedrock
- Used similarity search to generate dynamic SQL queries and presented the data as Natural language using LLMs.
- Optimized the LLM using LangChain framework to reduce API cost and response times by 50%.
- The project won 3rd prize in the OpenGenAI Hackathon and reduced data analytics effort at Open by upto 80%.

Football Merch | Spring Boot, Java, Maven, Spring Data JPA, Git

Oct 2020 – Dec 2020

- Developed an e-commerce application for football merchandise using Spring Boot and thymeleaf.
- Utilised Spring Data JPA and Spring Boot to create APIs for products, orders and other e-commerce components.
- Implemented thymeleaf templating engine for server side rendering of web pages following MVC approach.

TECHNICAL SKILLS

Languages: Java, Dart, C

Technologies: Spring Boot, Spring Data JPA, Hibernate, Maven, Gradle, Spring MVC, Spring Framework, Spring Security, Flutter, Firebase, Flutter Riverpod, Providers, Flutter BLOC, Http, Retrofit, Android, iOS, SQLite, JSON

Architectures: System Design, Data Structures & Algorithms, MVVM, RESTful APIs, Mircorservices, MVC, ORM

Databases: MySQL, PostgreSQL

Tools: Git, GitHub, Postman, Visual Studio Code, IntelliJ, Jira, Sourcetree, Apidog, Slack, Redis, Docker

Platforms: macOS, Windows

Soft Skills: Leadership, Communication and Collaboration, Time Management, Creative thinking, Problem solving

EDUCATION

Odisha University of Technology and Research

Aug. 2019 – Apr 2023

Bachelor of Technology, Information Technology, CGPA: 9.46

Bhubaneswar, Odisha

DAV Public School

May. 2018 – Apr 2019

Higher Secondary, Science, Result: 93.8%

Bhubaneswar, Odisha
